News and Information about Enterprise Applications, Automation and Infrastructure

In this issue:

- Forcing Functions: Economic Uncertainty and Infrastructure Modernization
- Wasted Cloud Spend to Exceed \$17.6 Billion in 2020
- Modernize Your ELK Stack
- Application and Infrastructure Topology Awareness

Forcing Functions: Economic Uncertainty and Infrastructure Modernization

by Simone Sassoli, Chief Customer Officer, Robin.io

The period of shock and retreat experienced in the early days of an economic scare are invariably followed by the emergence of a new normal. And while it's understandably too early yet for most folks to contemplate what that new normal might look like, some are doing just that.

The Cloud Is Booming — But so Is Cloud Waste

by Jay Chapel, DevOps.com

Fueled by the growth in cloud spend, cloud waste will exceed \$17.6 billion in 2020. Not surprisingly, the growth in spending often exceeds the growth in business. That's because a huge portion of what companies are spending on cloud is waste.

Modernize Your ELK Stack with Robin

by Ankur Desai, Product Director, Robin.io

ELK is an end-to-end log analysis solution that allows users to take log data from virtually any source and search, analyze, and ultimately visualize that data in real time. How is the data then used? Learn more in our blog series.

Application and Infrastructure Topology Awareness

by Partha Seetala, Founder and CTO, Robin.io

Total Topology Awareness

The world runs on apps. Apps run on infrastructure. Therefore, it is important that infrastructure is tuned to meet the needs of the application.

However, apps can be complex; infrastructure can be even more complex; and getting the two to work together can be exponentially complex. That's the challenge facing enterprise DevOps teams, and that's why application and infrastructure topology awareness is so important.
